

Uppsetning á þriggja kvölda tvímenningskeppni.

Fjöldi para er 34. Fjöldi spila milli para er 3. Fyrsta kvöld er 9 umferðir, næstu 2 kvöld eru 10 umferðir. Því næst ekki að allir spili við alla.

Opna Magic Contest og velja eins og sýnt er.

General

General

Contest name: Briggja kvöldá tvímennungur. Fyrsta kvöld

Signature: Bridgefélag Reykjavíkur

Scoring type: Matchpoints

Barometer

Two winners

The contest name is printed in the upper left corner and the signature in the bottom left corner of all reports. Naturally, this depends on how the reports are designed.

You do not have to click Advanced. If you do, you can set more advanced options for the selected scoring type. You will also find more options like how you enter results, how split scores are calculated, etc.

Score the sections separately

Enter all names, prepare the seating, and then select number of sections

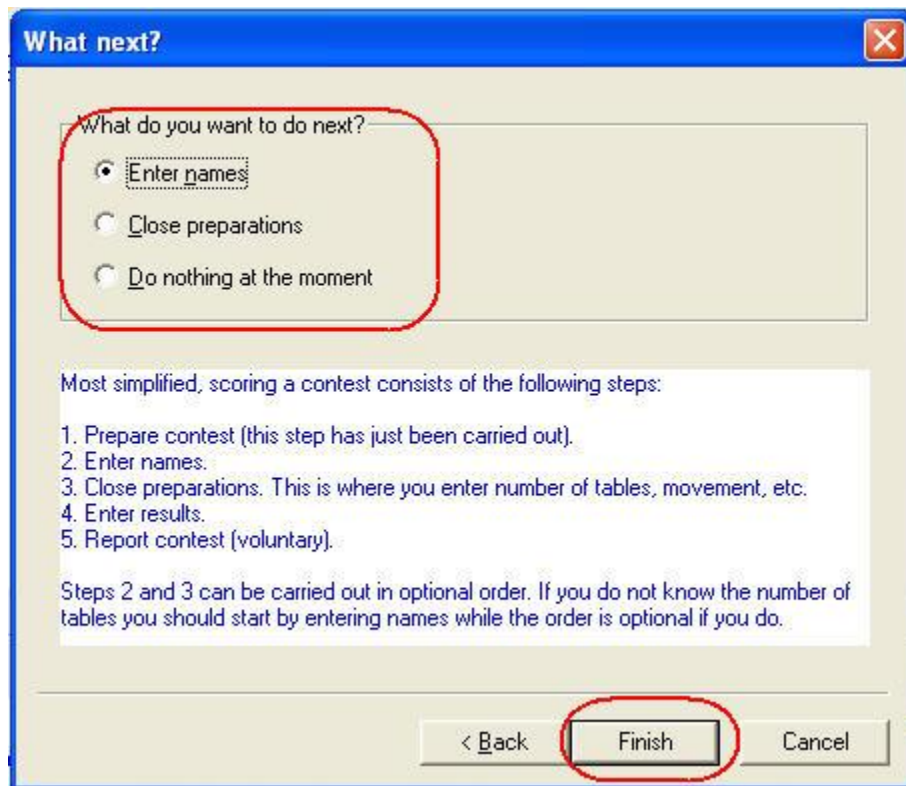

Specify the number of sections in your contest.

If you enter more than one section you will have to select a movement for every section. Names and results are also entered separately for each section.

The final score is calculated for all sections to get an overall winner. You may score the sections separately if you like.

Table

Number of tables: Random seating

Section letter: Scorecard colour:

Enter number of tables. If you have an odd number of pairs, add one table, i.e. enter 5 tables if you have 9 pairs.

If you click Random seating, the entered pairs will be positioned at the tables in a random order. This is to prevent players from strategically selecting opponents the first round. This, of course, means that you have to notify the player of the seating by printing a starting list.

Any pairs you enter after you have closed the preparations will stay at the tables where you have entered them.

17 borð. Yfirlitt er valið “Random Seating”

Board ✕

Board

Total number of boards:

Number of boards per round:

Your entries will be used to select a movement in the next window. If you want to use free pair entries, i.e. the alternative No movement, you can not use intervals but you must enter exact values in the fields above.

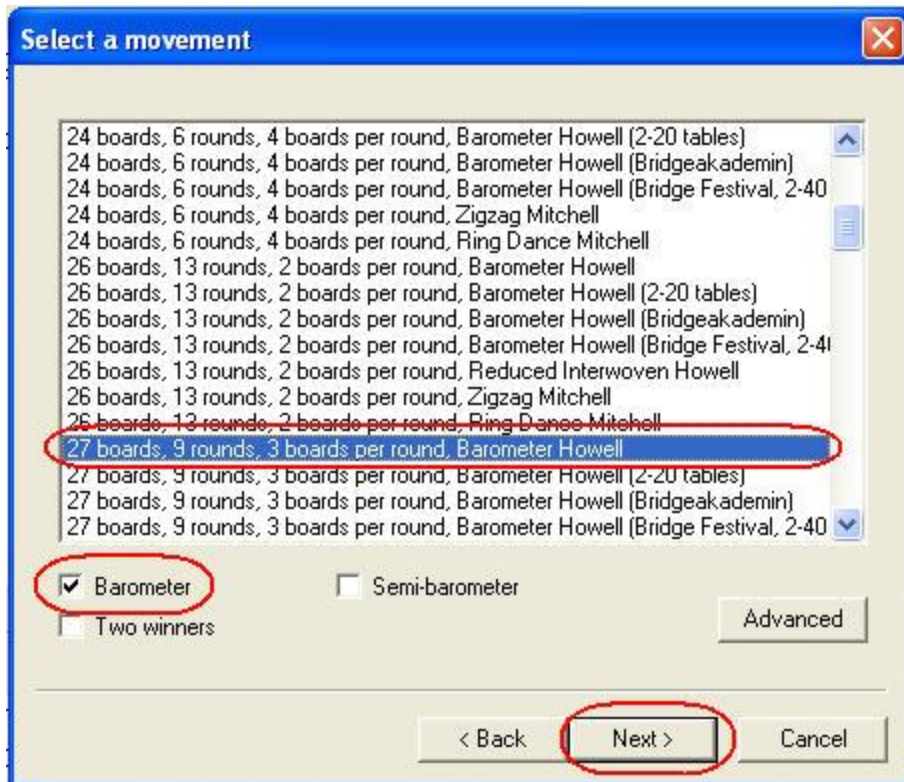

If you do not know, or do not care about, the exact number of boards or number of boards per round you may enter intervals in the following manner:

25-27 and 2-4 respectively

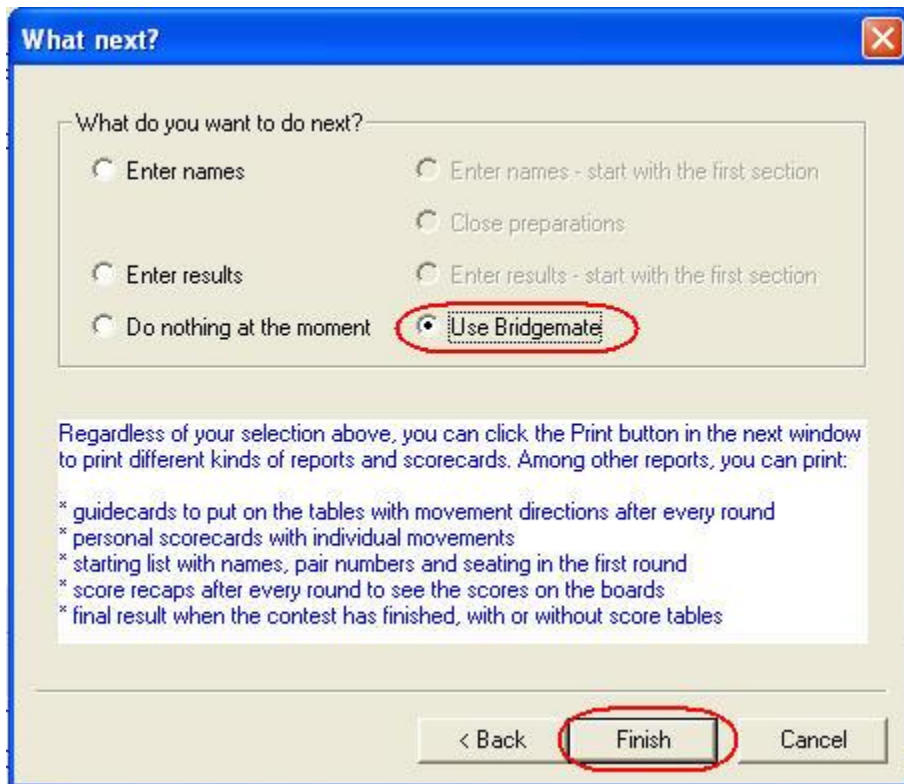

That way, Magic Contest will suggest all movements that fit the entered intervals. On the other hand, the alternative No movement (see the text above) will not be suggested since that requires exact entries.
